The diagram illustrates the synchronization of two networks, labeled 'Après-midi' (Afternoon) on the left and 'Matin' (Morning) on the right. Each network's timeline spans from 21 to 30. The first 15 minutes (21-25) are designated as 'Structure portfolio' (blue), and the next 15 minutes (26-30) are designated as 'Stage Naga synchronisée' (pink). The synchronization is achieved by aligning the 'Structure portfolio' periods of both networks. The vertical lists of C1 through C6 on the right side of each timeline indicate the specific components or stages involved in the synchronization process.
